## Career Objective

I'm looking to grow in a role where I can learn, take on new challenges, and contribute to a team's success. I want to build a meaningful career while making a real impact.

## Projects

Samusa blog:

[Live site](#) | [Github](#)

Samusa-Blog is a personal blog I created to share my thoughts and experiences. I write about topics I care about, from lifestyle to tech and everyday moments. The blog is simple and relatable, made for people who enjoy honest, easy reading.

Major features:

- ❖ Users can create an account, write blog posts, edit/delete their own blogs, comment on others' blogs, and filter blogs by search or category.

Gimox gym management:

[Live site](#) | [Github](#)

Gimox is a simple and user-friendly gym management system where users, trainers, and admins have separate roles. It includes trainer booking, membership plans, Stripe payments, and full dashboard management.

Major features:

- ❖ A complete gym management system with user, admin, and trainer roles, trainer booking, membership plans, Stripe payments, and full dashboard control.

## Technological Skills

- ❖ Front end Development: HTML5 , CSS3 , JavaScript , Reactjs , Tailwind CSS
- ❖ Back end Development: Nodejs , Expressjs , JWT
- ❖ Cloud and Database: Firebase , MongoDB
